Although the prior art of record teaches an adhesive bonding the spacers and the cover, the prior art of record does not teach the adhesive is provided in the gap that attaches the frame to the cover. The prior art of record also does not teach or suggest the recited constructional unit further including an adhesive provided between the frame and cover that attaches the frame to the cover and seals a region between the frame and the cover, the region having indentations that provide repositories for the adhesive. The prior art of record does not teach indentations that provide repositories for the adhesive.

The prior art does not teach motivation or suggestion for modification to make the invention as instantly claimed.

Any comments considered by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
